HANDS-ON TRAINING WITH ANATOMICAL PRECISION - IN THE HEART OF EUROPE

This exclusive **two-day** course offers a unique opportunity to practice advanced augmentation and implantation techniques on human head specimens **in a premium medical facility**. The program combines anatomical precision with clinical excellence, **designed for dental professionals** aiming to master both foundational and advanced surgical approaches in a risk-free, safety environment.

WHAT MAKES THIS COURSE EXCEPTIONAL?

Realistic Surgical Simulation:

Thanks to our **special tissue preservation** technique, the cadaveric head specimens provide highly lifelike anatomical detail and tissue behavior.

Hands-On, Small-Group Format:

With a **maximum of two participants** per surgical station, each attendee receives continuous hands-on time and personalized guidance from expert instructors.*

RECOMMENDED FOR:

- Oral surgeons
- Periodontists
- Implantologists
- General dentists

Budapest, Hungary
